

I AM NCR SECURE ACCESS

Secure remote access from anywhere

It is easier than ever to view and print Aloha Manager reports, access your sites, and gain visibility to potential operational and security risks through proactive alerts. NCR Secure Access uses the most current security best practices to ensure data at the site remains safe and secure when accessed remotely.

Run reports

When logged in, you have the ability to run and print specific system reports at a single site from anywhere.

Remote control to back of house

Using a secure VNC connection, NCR Secure Access allows users to establish a remote connection with the back of house server. A remote user is able to access and navigate as if they are actually at the site.

File transfer to back of house

Securely transfer files to the site server from a remote computer "behind the scenes".

Why NCR?

NCR Corporation (NYSE: NCR) is the global leader in consumer transaction technologies, turning everyday interactions with businesses into exceptional experiences. With its software, hardware, and portfolio of services, NCR enables more than 550 million transactions daily across retail, financial, travel, hospitality, telecom and technology, and small business. NCR solutions run the everyday transactions that make your life easier.

NCR is headquartered in Duluth, Georgia with over 30,000 employees and does business in 180 countries. NCR is a trademark of NCR Corporation in the United States and other countries. The company encourages investors to visit its web site which is updated regularly with financial and other important information about NCR.

Only outbound connections

An agent running at the site and a client application on your local computer provides secure, outbound connections to a PCI-validated datacenter.

Encrypted communications

All communications to and from the site are encrypted using Secure Sockets Layer (SSL) and Secure Shell (SSH) to maximize security.

User authentication

NCR Secure Access eliminates the risk of social engineering attacks due to its unique form of two-factor authentication.

Logging

NCR Secure Access securely logs all user activity at the data center.

Alert

System alerts are displayed prominently on the NCR Secure Access main screen to provide quick and easy notification that a potential security risk has been detected or some other operational issue was encountered. This information enables you to be proactive in addressing potential problems at the site.

Security alerts

- Unauthorized remote access application detected
- Windows updates turned off or out of date
- No anti-virus software detection

Operational alerts

- Unsettled credit card batch
- Pending offline credit transactions
- Low disk space

NCR continually improves products as new technologies and components become available. NCR, therefore, reserves the right to change specifications without prior notice.

All features, functions and operations described herein may not be marketed by NCR in all parts of the world. Consult your NCR representative or NCR office for the latest information.
